

INFOSYS E-PROCUREMENT SOLUTION

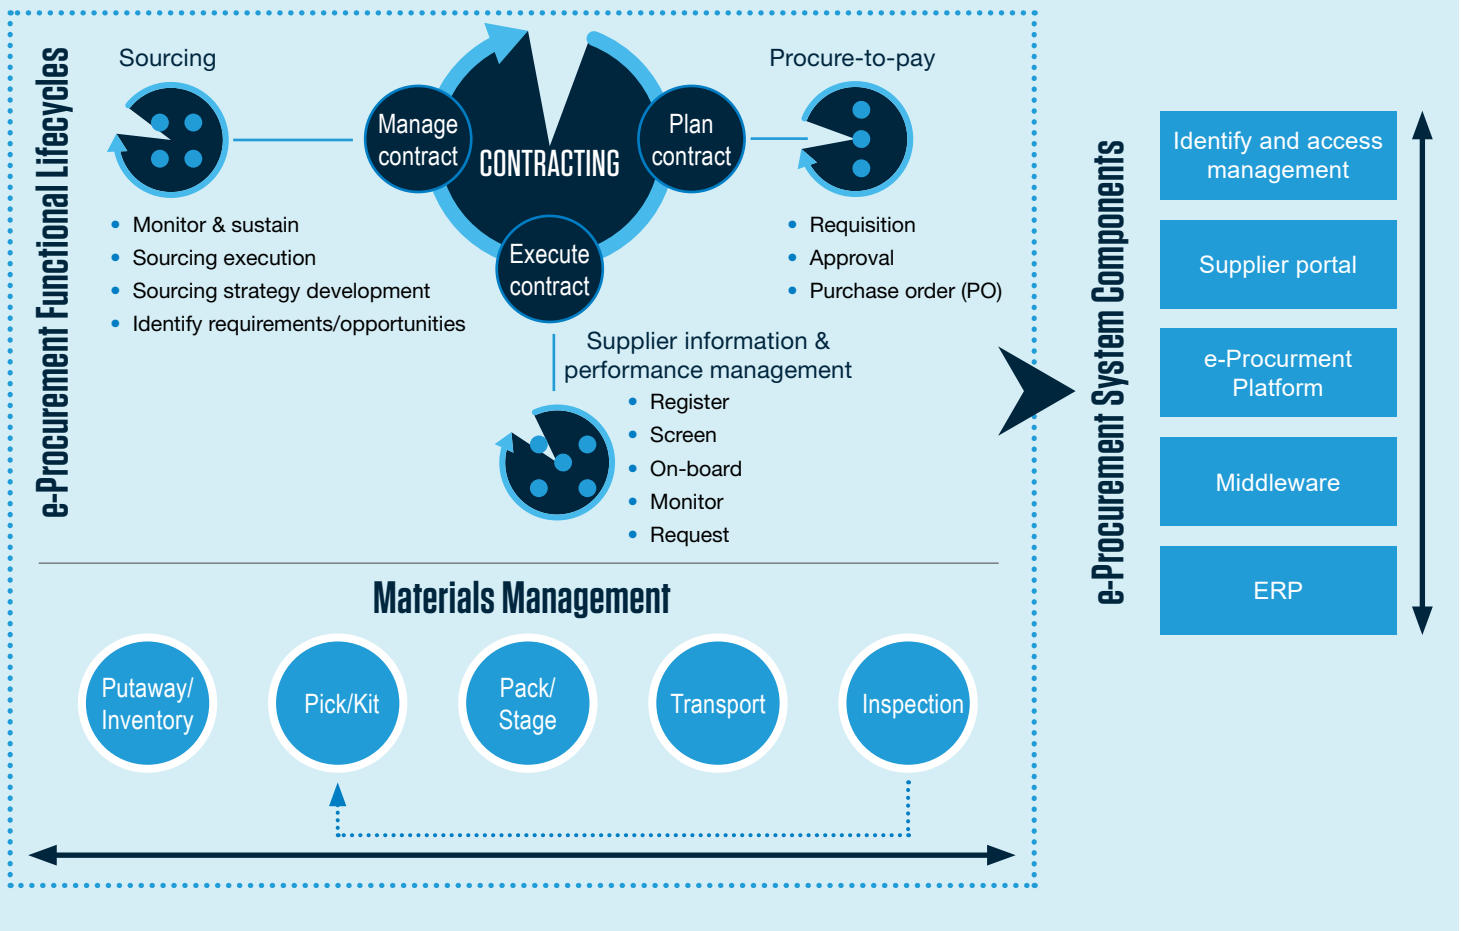

Modernize and digitize public sector procurement

Procurement is undergoing a digital switch. Public sector organizations need to transform their procurement systems and processes to be more agile, open, and responsive. **Infosys E-Procurement Solution (EPS)** enables public sector organizations to accelerate this transformation and be ready for this digital future.

EPS is a cloud-based, procure-to-pay solution, designed and delivered by Infosys Public Services in partnership with EY and SAP Ariba. The solution enables departments to purchase various goods and services through a single portal, configure specific requirements easily, and access data, reporting and analytics information in real-time to support more effective decision-making.

Key components of EPS

Architected using SAP Ariba, SAP Fieldglass, Azure Active Directory, and ServiceNow, and delivered via a managed services cloud, EPS offers end-to-end eProcurement capabilities through the following key components.

Key features and benefits of EPS

Government wide

Web-based

Modern UI

Reliable

Compliant

Bilingual

Controlled deployments

DEPARTMENTS

One-stop-shop:

Common, government wide platform for different departments to procure goods and services

Self-service tools:

Greater number of procurement instruments like Standing Offers and Supply Arrangements, e-enabled through self-serve e-catalogues

Reduced administrative burden:

Fully digital operations and simplified processes reduce time and effort for contract receipt, review, and award

Procurement intelligence:

Better access to data and procurement analytics for improved decision making

SUPPLIERS

Improved supplier experience:

Accelerated procurement cycles and expanded access to different departments

Supplier relationship management:

Optimized business process through improved cycle times, workload efficiency and supplier performance management

GOVERNMENT

Increased visibility and control of catalogue spend using procurement vehicles aimed at managing services/contingent labour (hourly, SOW, deliverables, milestones)

Procurement transformation for Public Services and Procurement Canada

Infosys Public Services (IPS) implemented EPS for Public Services and Procurement Canada. The solution is digitizing procurement, advancing the government's socio-economic objectives, and delivering better results for Canadians.

The contract with PSPC for EPS offers options to the broader Canadian public sector (provincial governments, municipal governments, and quasi-governmental agencies) to acquire the e-Procurement Solution. Organizations can leverage the contract to configure, implement, and/or finance their own instance of the electronic procurement solution or leverage the existing EPS solution, accelerating their digital procurement journey.

Contact Michel.Tourigny@infosys.com to learn more about the EPS and to know how it can help your department digitize procurement.
