

INFOSYS CELTIC VEHICLE AND LICENSING SOLUTION

DIGITIZING VEHICLE AND LICENSING SERVICES FOR 19 JURISDICTIONS

Digital technologies offer transportation agencies an opportunity to transform operations and service delivery.

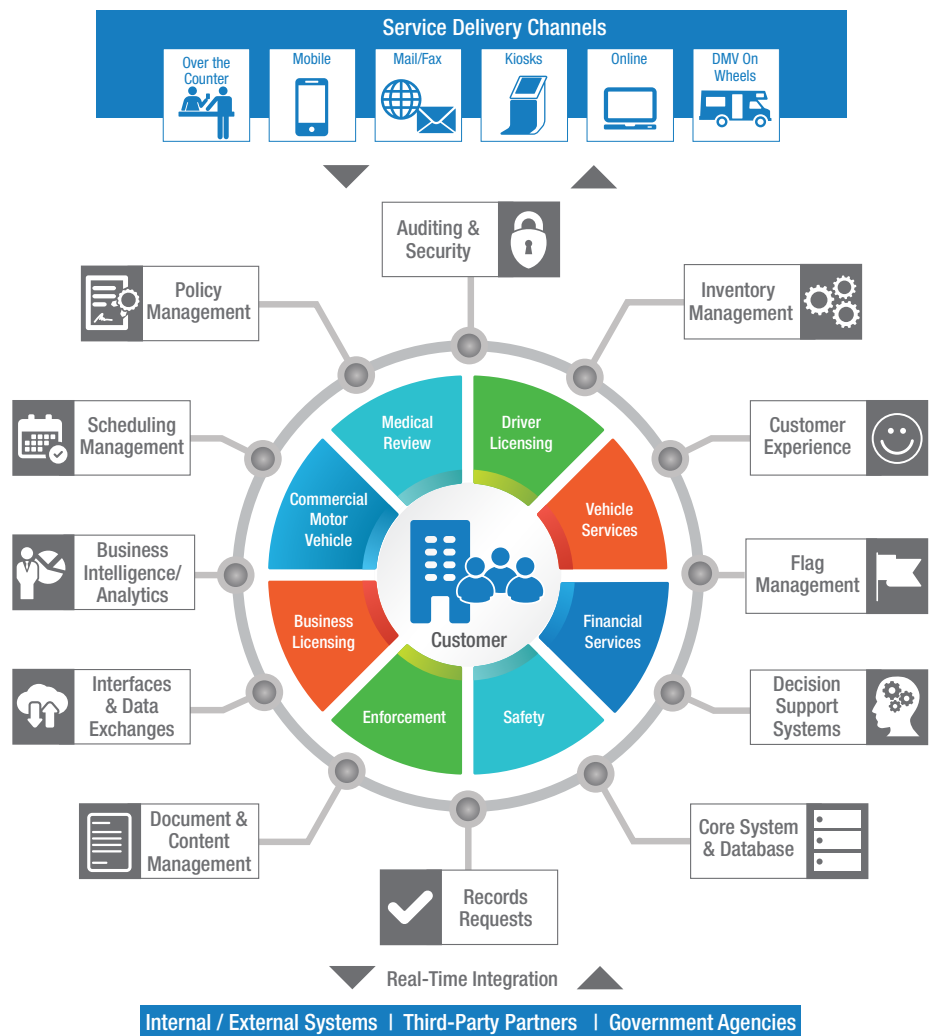

Infosys Celtic Vehicle and Licensing Solution (IC-VALS) is an integrated, commercial-off-the-shelf (COTS) solution that helps agencies successfully navigate this digital transformation.

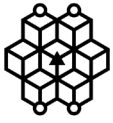

IC-VALS consists of interoperable modules that digitize both the core and ancillary functions like licensing, titling, registration, safety and enforcement, document management and reporting.

These modules can be implemented together or separately, and can be easily extended with new capabilities to build a truly modern, customer-centric, scalable and future-ready digital platform.

IC-VALS is built on an open-source architecture, using proven web-technologies. This gives agencies the flexibility to maintain the solution themselves and not get locked-in with a particular vendor.

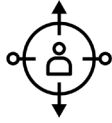

Key features and benefits

Modularity

Loosely coupled components ensure flexibility and faster deployment

360° Customer View

One-client, one-record model to understand customer better and personalize service delivery

Scalability

Service-oriented architecture and web-services simplify integration, ensure extensibility

Configurability

Flexible rules engine that meets ~80% of requirements and can be easily configured by users to meet new requirements

Multi-channel Access

Anytime, anywhere services delivered through a variety of devices

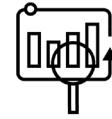

Responsive UI

Simple, intuitive user interface that meets accessibility standards

Security

Role-based access and latest cyber security methodologies for assured service delivery

Comprehensive Reporting

Real-time reporting with a host of visualization options for improved decision making

Navigating digital transformation with Infosys Public Services and Celtic

Celtic Systems is a successful developer of enterprise solutions for motor vehicle administrators and Infosys Public Services is a leading provider of consulting, technology and next-generation digital services.

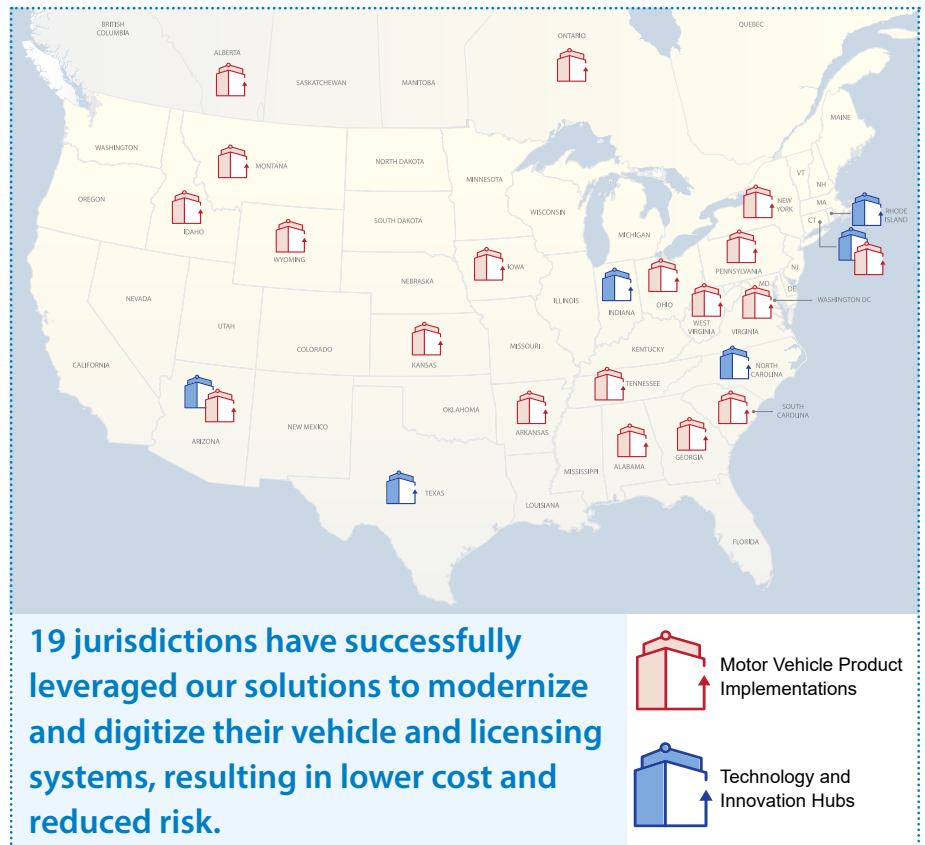

Together, we bring 50+ years' experience of successful execution of complex IT initiatives for 1200+ organizations across different industries.

We offer complementary capabilities that enable jurisdictions to navigate from where they are to where they want to be.

Celtic's proven COTS solution modernizes and digitizes the motor vehicle and licensing systems.

Infosys' proven execution and flexible delivery approach ensures predictable, on-time, on-budget implementation.

Our joint solutions incorporate emerging technologies like AI, Automation, Mobility and Augmented Reality and allow jurisdictions to rapidly develop new capabilities for a digital future.
